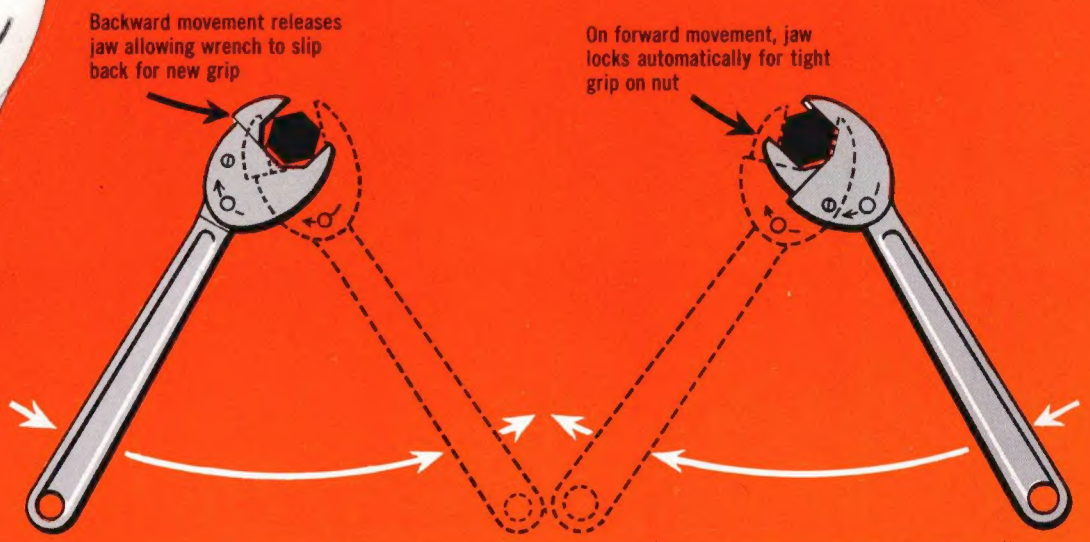
BESSEY

U. S. PATENT NO. 2765690

Self-gripping Ratchet Wrenches

NEW! INVENTION! TIME-SAVING! AUTOMATIC!

SELF-ADJUSTING Ratchet Wrench



Backward movement releases jaw allowing wrench to slip back for new grip
On forward movement, jaw locks automatically for tight grip on nut

The BESSEY self-adjusting, self-gripping ratchet wrench is a new invention operating across points under spring load. It is an exclusive design with a U. S. patent. The BESSEY self-adjusting ratchet wrench is strong, durable, efficient and time-saving. Always ready, no buttons to press, locks automatically and operates with one hand. It is fast, self-gripping and easy to use, not a "Knuckle Buster."

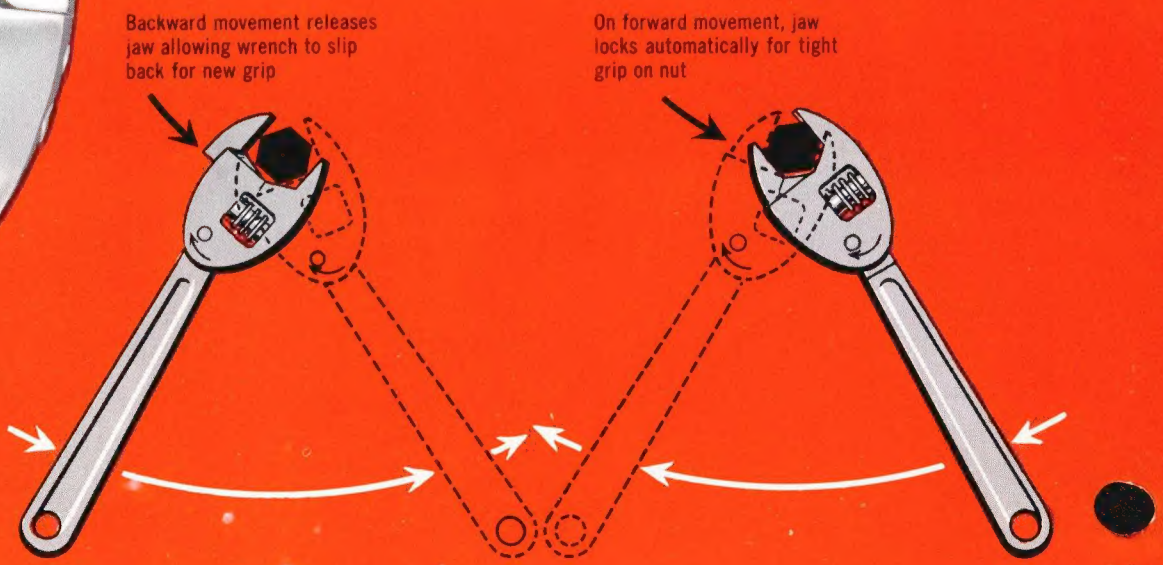
U. S. PATENT NO. 2765690

Self-gripping Adjustable Ratchet Wrench



Backward movement releases jaw allowing wrench to slip back for new grip
On forward movement, jaw locks automatically for tight grip on nut

The BESSEY adjustable self-gripping ratchet wrench is a new invention operating across points under spring load. It can be adjusted to fit nuts of various sizes by turning the adjusting knurl. It is an exclusive design with a U. S. patent. The BESSEY adjustable ratchet wrench is strong, durable, efficient and time-saving. Always ready, no buttons to press, locks automatically and operates with one hand. It is fast, self-gripping and easy to use, not a "Knuckle Buster."
